Project Information

(Copy this section and fill out for each species)

Target Species: Garlic Mustard

First year of treatment? Yes

Size of infestation: 1 Acre +/-

Treatment Method (please be specific): Garlic Mustard was pulled by hand making sure that the whole root was also pulled. It was then put into black bags that will be set out to solarize for the rest of summer and then taken to a licensed landfill.

% Completed: 99%

Amount removed (# bags, # plants, # mature, # seedlings): 12 bags

Time spent on removal: 4 hours +/-

Is follow-up needed? In 2021 it is advised that we perform this event again.

Were treatments uploaded to iMapInvasives? Yes
