Project Information

*****Remember to obtain proper permissions before completing any treatment project.**

Is this the first year of treatment? If not, consider creating an invasive species management plan for your project.

Total # of Participants: 3

Time Spent on Removal (hours, minutes): 2 hours.

Is follow-up needed? What time of year and how often during the season? These sites should be checked again for regrowth between June and July before invasive bittersweet and honeysuckle fruit.

Target Species: invasive bittersweet, Morrow's honeysuckle

Tier and Rank: 4, VH

Treatment Method (be specific): Bittersweet was pulled, and roots dug out, honeysuckle was cut back and roots were removed as well as possible given their location near the culvert

Disposal Method: Brush pile
